

February 22, 2010

Dear CSEI Client,

First – Thank you for your business. We value your trust in us to work with you to assist you in solving your business problems.

On Monday, February 22, 2010, CSEI ceased doing business. In order to accommodate our customers, Heartland Business Systems/Avastone Technologies has been contacted to service our customer needs. Many of our former employees have been hired by Heartland/Avastone to make any transition as seamless as possible.

Heartland Business Systems /Avastone Technologies is a technologically strong Wisconsin based company that has provided quality technology and development services to Midwest clients for over 15 years. They bring an impressive portfolio of services, resources and a solid reputation in our industry.

The Heartland Business Systems and Avastone Technologies offices will be located at N28 W23050 Roundy Drive, Suite 2A, Pewaukee in the coming months.

Heartland/Avastone will provide excellent service with as little interruption as possible to your business."

You will see a change in invoices that will reflect the Heartland and/or Avastone name (based on the specific service) and a change in the remittance location. For our clients that work with our diversity entity Abaxent there will be no changes.

Again the CSEI team thanks you for your past business and the Heartland/Avastone/Abaxent team looks forward to sharing with you soon the new expanded and integrated services and capabilities.

Adonica D. Randall
